

elcometer 4360 Spiral Bar Coaters

Made of stainless steel and consisting of a cylindrical bar wound with stainless steel wire, these spiral bar coaters are used to spread one or more products, with a high levelling ability, on a wide variety of substrates, even flexible ones.

- A wide range of gaps available providing a wide range of coating thicknesses: from 4 to 500µm.
- Two film widths: 140mm or 250mm; other widths on request.

Ideal for use with the Elcometer 4330 or Elcometer 4340 Motorised Film Applicators.

A special table fitted with a clamp and a flexible mat for optimal manual application is also available.
