

M20 Hygro Thermometer

The M20 Low Cost Hygro Thermometer is a very popular model in the industry and is widely used. It is the most competitively priced unit in our Hygro Thermometer range.

Hygro Thermometers also known as Thermo Hygrometers and are instruments that measure Relative Humidity (RH) and ambient temperature. These are both critical measurements in a quality control process.

Features

- Displays Temperature and Relative Humidity (RH) simultaneously
- Automatically records Minimum and Maximum readings for Temperature and Humidity
- Compact, lightweight, and simple operation features
- Option to hang or stand
- Ideal for Computer Rooms, Laboratories, Office Environments, Home and Caravanning
