

DF Series Industrial Fibrescope Internal Inspection Tool

DF Series of Industrial Fibrescopes with fibre optic image bundle technology and 2 or 4 way articulation

Our **DF Series** is designed to be used as is or combined with the **ForeEyes™ 2020-C** to display and record all inspections. By utilizing a brilliant white LED on the handle of the articulating fiberscope, your system can be totally battery operated to allow you the freedom to inspect in the most remote locations.

We offer a complete line of video inspection products to satisfy the most difficult applications while being mindful of your budget.

All DF Series standard industrial flexible Fiberscopes incorporate high resolution fiber-optic image bundles.

The three 4mm models are available with standard quality fiber-optic bundles or ultra high resolution fiber-optic bundles.

Specifications for the DF Series are subject to change for product improvement without notice.
