

# elcometer® 3600 Doctor Blade Film Applicators

Can be used in accordance with:

ASTM D 823  
 FTMS 141 a M4121  
 FTMS 141 a 4122.1  
 FTMS 141 a 2161  
 FTMS 141 a 2162  
 FTMS 141 a 6226

Made of hardened stainless steel with a flat-edged bevelled blade applicator body, these adjustable applicators are suitable for various products applied on flat and relatively firm surfaces.

Supplied with a set of nineteen thickness gauges from 30 to 1000µm (1 to 40mils) to allow the accurate setting of the gap by vertical adjustment of the scraper.

The Elcometer 3600 Doctor Blade Film Applicator has a maximum gap size of 3mm and is available in a range of film widths.

Our Doctor Blade film applicators can be used with the Elcometer 4330 and Elcometer 4340 range of Motorised Film Applicators.

## Technical Specifications

Model	Description	Gap Size	Film Width	Part Number
		µm	mm
