

elcometer 4330 Basic Motorised Film Applicator

Can be used in accordance with:
ASTM D 823 Method C

A simplified lower-cost version of the Elcometer 4340 Model Range used to apply consistent and repeatable films.

The Elcometer 4330 is equipped with a system for fixing spiral bar coaters or other film applicators. Three buttons control the operation and direction of the fixing bar, and one button controls the speed.

Samples are secured with clamps over the supplied flexible non slip rubber mat. Can be used with the Elcometer 4360 range of Spiral Bar Coaters.
