

elcometer® **7400 Compact Moisture Meter**

The hand closes naturally around the ergonomic form of the housing so that the pins on the end of the instrument can be pressed into the material to be measured. The thin pins make it easy to measure the moisture content of sawn timber, chipboard and fibreboard materials up to a maximum thickness of 25mm as well as normal gypsum or mixed plaster.

- Handy, quick pocket-sized moisture meter for fast measurements.
- Two-group wood species correction.
- Measurement of plaster moisture content with a direct readout in percentage of dry weight.
- Completely automatic instrument setting.
- No separate electrodes or leads required.

Technical Specifications

Measuring Range	5 to 20% moisture content for wood with two-group species correction 0.3 to 3.5% moisture content for plaster, with large 3-digit LCD readout.
Dimensions	200 x 35 x 35mm
Weight	130g
Power supply	9 V dry cell or rechargeable battery
Part Number	K0007400M018
