

# 134 Dual Illuminated Magnifier

## 3X and 10X

From time to time a closer inspection of a surface is required to ascertain the exact conditions of the material profile, cleanliness etc.

Furthermore, many environments can be in low light or dark areas – ballast tanks, oil and gas tanks etc.

### Features

- Light, battery powered, portable magnifier
- Ideal for comparison with surface comparators
- X3 magnification for surface inspection – Illuminated
- X10 magnification for closer surface inspection – Not Illuminated

Other Illuminated Pocket Microscopes with 30x & 100x magnification are also available.
