

elcometer® **2300 Rotational Viscosity Standard Calibration Oils**

Silicone standard oils are used to check viscosity measurements. The values are given for 6 different temperatures between 20°C and 27°C

The oils listed below are specifically manufactured for use with Elcometer Rotational viscometers and values quoted are nominal at 25°C.

Part Numbers

Part Number	Description
KT009999N001	Standard calibration oil (60ml/2floz) - 300cPs
KT009999N002	Standard calibration oil (60ml/2floz) - 700cPs
KT009999N003	Standard calibration oil (60ml/2floz) - 1000cPs
KT009999N004	Standard calibration oil (60ml/2floz) - 25000cPs
KT009999N005	Standard calibration oil (60ml/2floz) - 40000cPs
KT009999N101	Standard calibration oil (500ml/1pint) - 300cPs
KT009999N102	Standard calibration oil (500ml/1pint) - 700cPs
KT009999N103	Standard calibration oil (500ml/1pint) - 1000cPs
KT009999N104	Standard calibration oil (500ml/1pint) - 25000cPs
KT009999N105	Standard calibration oil (500ml/1pint) - 40000cPs
