# SH-A Shore A Digital Durometer Hardness Tester

The SH-A Shore A digital rubber hardness tester is designed for testing the hardness of soft rubber, printer rollers and other elastomer materials (ASTM--D--2240). This easy to use hardness tester with simple structure and small body us lightweight and gives intuitive readings. Taking hand-held measurements and can also be placed in a cradle with a set load test.

Features

- Easy to use
- Zero Setting
- Small and lightweight
- Intuitive readings
- Power Supply – 1 x 1.5V battery

Technical Specifications

Part Number	Description
SH-A	SH-A Shore A Digital Durometer Hardness Tester
Measuring range	0 - 100 HA
Resolution	0.5 HA
Accuracy	±1 HA
Force	0.55 - 8.06 N
Applications	General rubber, synthetic rubber, soft rubber, poly-resin, leather, wax, etc
Indenter shape	Flat cone point 0.79mm 35º Included Angle
Net weight	0.5kg

Packing List

SH-A Shore A Digital Durometer Hardness Tester
Hard Plastic Carry Case
Operating Instructions
