

BEVS 2501/S Laboratory Mixer

BEVS 2501/S Laboratory Mixer is a portable dispersing machine designed for easy operation. It features an integrated stirring shaft and a variable frequency drive for precise motor speed control. With a multifunctional design, it can perform dispersion, mixing, and grinding simply by changing different dispersing discs. The current operating speed is displayed in real time, making it an ideal choice for research, laboratory work, and on-site testing.

Features

- Simple and efficient operation
- Real-time speed display on LCD screen
- Secure and convenient mixing tank clamp for quick setup
- Integrated stirring shaft with low vibration for faster, more stable dispersion

Technical Specifications

Parameter	Specification
Lifting stroke	0-210 mm
Maximum mixing volume	3 L
Speed	30-9000 rpm
Power	550 W
Power supply	100-230 V, 50/60 Hz
